***Allowable Subject Matter***

1. Claims 24 and 26-33 are allowed.
2. The following is an examiner's statement of reasons for allowance. In the independent claims, applicant has claimed a method for comparing the analyte profiles of mammalian breath samples to diagnose and monitor a medical condition comprised of the following steps: contacting an array of sensors with a first sample of mammalian breath to identify analytes in the first sample, storing the results of the analysis of the first sample in computer readable format, contacting the array of sensors with a second sample of mammalian breath to identify analytes in the second sample, and then comparing the results of the second sample with the stored results to compare the analyte profile and using the comparison of the profiles to diagnose and monitor a medical condition. The Examiner did not find prior art which disclosed or suggested this combination of steps. The Examiner considers the reference "Ekstrom" to be the closest prior art found.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 1743
